

Graphite's 10 – 50X Advantage

Leverage a 10 to 50X advantage
on digital implementation

Graphite's syndicate offers digital transformation at 10X less the price (and risk) of going it alone

The Graphite syndicate offers incredible leverage. By working together, members share the cost of building a digital interoperability platform and a common data model.

The result is that members get a transformative digital health platform at 1/10th the cost had they done it "in house," all while ensuring that the collective objective remains healthcare's triple aim.

GRAPHITE HEALTH

Removing friction in healthcare together

www.graphitehealth.io

Today, implementing new digital solutions takes most healthcare organizations 12+ months

For most organizations, implementing a new digital solution requires navigating a maze of multiple steps that often takes more than a year before the solution is fully deployed within the organization.

With Graphite, members get a 50X speed improvement for implementing new digital solutions

FROM SELECTION...

Pick the right solution to address your business problem or improve care delivery from Graphite's app marketplace.

50X
faster

... TO DEPLOYMENT (IN DAYS, NOT MONTHS)

With a few clicks, the solution is deployed and operational across the organization.

Graphite's app marketplace enables new digital solutions that are ready to plug and play. Pricing and the BAA are standardized and transparent, eliminating the need for contractual negotiations. And every app that's submitted to the Graphite platform meets specific data privacy and HIPAA protocols, further streamlining the implementation process.
